

BLOMMER CHOCOLATE COMPANY

GOLD LINE (NON-GMO CHOCOLATE)

“GOLD” PRODUCTS MANUFACTURED BY BLOMMER CHOCOLATE WILL USE INGREDIENTS FROM NON GMO SOURCES

The ingredients for “Gold” products manufactured by Blommer Chocolate Company will be selected based on their genetic status and treatment following current industry and supplier information.

- Cocoa Beans have not been genetically modified.
- Sugar Cane has not been genetically modified.
- Soy Lecithin will be Identity Preserved, meaning it originates from non-genetically modified soybeans and documentation and testing of the product at various stages from the farm to finished product confirm that it is solely from non-genetically modified sources.
- Flavorings added to “Gold” products will be from Non-GMO sources.

Our Research and Development team uses a hands on approach to collaborate with our customers and help them to be the best in their industry.

Blommer Chocolate verifies the genetic status of raw materials with suppliers using the below criteria:

- A Non-GMO Source
- Compliance with European Regulations
- Statements and testing of soy lecithin

WHAT DOES “NON-GMO PROJECT VERIFIED SEAL” MEAN?

The verification seal indicates that the product bearing the seal has gone through the Non-GMO project verification process.

This verification is an assurance that a product has been produced according to consensus-based best practices for GMO avoidance.

ARE PRODUCTS BEARING THE “NON-GMO PROJECT VERIFIED” SEAL NON-GMO?

The verification seal indicates that the product bearing the seal has gone through the Non-GMO project verification process. This verification is an assurance that a product has been produced according to consensus-based best practices for GMO avoidance.
